

Key Findings of the Safe Schools Initiative, 2002

1. Incidents of targeted violence at school rarely were sudden, impulsive acts.
2. Prior to most incidents, other people knew about the attacker's idea and/or plan to attack.
3. Most attackers did not threaten their targets directly prior to advancing the attack.
4. There is no accurate or useful "profile" of students who engaged in targeted school violence
5. Most attackers engaged in some behavior prior to the incident that caused others concern or indicated a need for help.
6. Most attackers had difficulty coping with significant losses or personal failures. Moreover, many had considered or attempted suicide.
7. Many attackers felt bullied, persecuted, or injured by others prior to the attack.
8. Most attackers had access to and had used weapons prior to the attack.
9. In many cases, other students were involved in some capacity.
10. Despite prompt law enforcement responses, most shooting incidents were stopped by means other than law enforcement intervention.
